securing people

## BEACON

The GEOSATIS Beacon is a Radio-Frequency (RF) transmitter that communicates with the offender's GPS / RF one-piece device to provide consistent indoor location information and offer agencies the ability to more closely restrict an offender's movements within a specific site, ie. Home, work, treatment facility.

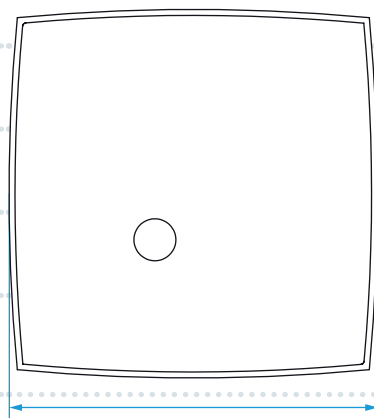

Beacon status and alarms are included in the transmissions and are communicated to the GEOSATIS software by the offender device via cellular channels.

### Secure

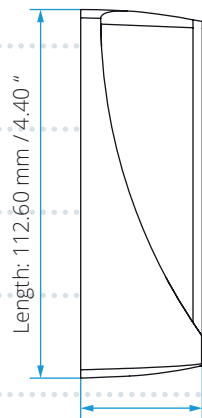

- Motion detection sensors
- Tamper-evident
- Battery low alarm

### Convenient

- Quick and easy installation
- No maintenance
- No power supply
- No phone line

Width: 112.60 mm / 4.40 "

Height: 37.50 mm / 1.45 "

<b>Weight [g / oz]</b>	350 g / 10.58 oz
<b>Battery overall lifetime</b>	2 years
<b>IP Rating</b>	IP 68 (Waterproof)
<b>Tampering detection</b>	Movements, case opening detection

GEOSATIS offers secure, reliable, convenient and cost-effective offender monitoring technology for the community supervision of parolees, probationers and defendants; and works with criminal justice agencies to enhance public safety, improve offender rehabilitation and reduce recidivism.
