- » Information sharing & collaboration
- » Analytical reports
- » Behavioral health assessments
- » Ability to integrate with existing infrastructure

TRACKcase Description:

Web-based Case Management System

OUR MISSION:

To Enhance Public Safety & Improve Lives

TRACKtech SOLUTION

A comprehensive platform offering whole-person rehabilitation and monitoring services. The program fosters officer/program member collaboration by understanding and monitoring risks, needs and responsivity.

TRACKtech's platform, which includes a broad spectrum of data and workflow automation, enables officers and agencies to implement individualized and responsive case plans, connecting program members (supervised individuals) to prosocial, community-based resources, meeting criminogenic needs and reducing the likelihood of recidivism.
